

VASANTH KUMAR

SOC Analyst | Security Analyst

+91 9786183898 | iamvasanth2k4@gmail.com | GitHub | LinkedIn | Portfolio

SUMMARY

Cybersecurity graduate with hands-on experience in SOC operations, SIEM monitoring, alert triage, threat hunting, incident response, and security automation through practical home labs and cybersecurity projects. Seeking an entry-level SOC Analyst, Security Analyst, or Cybersecurity Analyst role.

SKILLS

SOC & Security Operations

SOC Operations, Alert Triage, Threat Hunting, Incident Response, Log Analysis, IOC Analysis, Phishing Analysis, Vulnerability Assessment, Jira (Incident Ticket Management - Basic)

Networking

OSI Model, TCP/IP, DNS, HTTP/HTTPS, SMTP, DHCP, Common Network Ports, Network Troubleshooting

SIEM & Detection

Splunk, Microsoft Sentinel, Wazuh, Sysmon, Active Directory, Windows Event Logs, EDR Concepts

AI & Automation

LLM Integration, Prompt Engineering, Groq API, n8n

Cybersecurity Tools

Wireshark, VirusTotal, CyberChef, Nmap, Burp Suite, Metasploit Framework, Nikto, John the Ripper

Digital Forensics

Autopsy, FTK Imager, Evidence Acquisition, File System Analysis

Programming

Python, PowerShell, Bash

Frameworks

MITRE ATT&CK, Cyber Kill Chain

Additional Skills

Microsoft Azure, Git, GitHub, Visual Studio Code

PROJECTS

Enterprise Phishing Email Triage Lab | GitHub

- Tools: VirusTotal, CyberChef, Email Header Analyzer, SMTP Header Analysis
- Built a structured phishing investigation workflow to extract IOCs and document findings.

SOC Incident Investigation & Alert Triage Lab | GitHub

- Tools: Splunk, Sysmon, Windows Event Logs, MITRE ATT&CK
- Implemented alert triage and IOC analysis workflows to document simulated incident attacks.

Threat Hunting Dashboard | GitHub

- Tools: Python, Flask, Splunk, VirusTotal API, GeoIP API, MITRE ATT&CK
- Automated IOC enrichment with VirusTotal and GeoIP APIs to improve threat visibility.

AI-Driven SOC Monitoring Dashboard | GitHub

- Tools: Python, Streamlit, Scapy, Groq AI API, LLM, SQLite
- Integrated LLM-based analysis to assist SOC workflows and incident response.

Real-Time Threat Detection & Auto-Blocking System | GitHub

- Tools: Python, Groq AI API, Windows Firewall, PowerShell, psutil
- Implemented automated response workflows to block suspicious IPs and generate security alerts.

EXPERIENCE

Cybersecurity Home Lab

- Built and maintained a home lab to practice SOC operations, security monitoring, threat analysis, threat hunting, log analysis, alert triage, and incident response using Splunk, Wazuh, Sysmon, Kali Linux, and Windows.

Penetration Testing Lab

- Conducted vulnerability assessments and web application testing using Nmap, Burp Suite, Nikto, and Metasploit in authorized lab environments.

Digital Forensics Practice

- Performed evidence acquisition and forensic analysis using Autopsy and FTK Imager on simulated investigation scenarios.

Security Automation

- Developed Python and PowerShell scripts with n8n workflows to automate repetitive security tasks and improve SOC efficiency.

Full Stack Development Intern | Livestream Technology, Coimbatore | 30 Days

- Assisted in developing and testing web application features while following software development best practices.
- Collaborated with the team on debugging, documentation, and application maintenance tasks.

EDUCATION

Master of Computer Applications (MCA) | 2026-2028

Sri Sai Bharath College of Arts & Science

B.Sc. Cybersecurity & Digital Forensics | 2023-2026

Rev. Jacob Memorial Christian College

CERTIFICATIONS

- TryHackMe - SOC Level 1 Path (Completed)
- TryHackMe - Jr. Penetration Tester Path (Completed)
- Microsoft Student SOC Program Foundations (Completed)
